

Dear Parent/Guardian,

At St Aldhelm's Academy, we're proud to offer a broad and practical KS3 Technology rotation where students get hands-on experience in a range of subjects, including: – Catering, Design and Technology, Engineering and ICT

To make sure every student can take part fully, we provide all materials and ingredients for every rotation. Many schools ask families to supply ingredients for Catering, but we know this can sometimes prevent students from cooking. By purchasing ingredients and materials in bulk, we keep costs down and ensure every student has equal access to practical learning opportunities.

We're therefore asking for a voluntary contribution of £15 to help us continue providing these resources. This is, of course, a contribution only if you can, and there's no obligation to pay. Families are also welcome to contribute more than once throughout the year if they wish to further support the department.

Contributions can be made via ParentPay. Every contribution, no matter the size, makes a genuine difference in helping us maintain the high-quality, hands-on experiences that our students love.

Thank you for your continued support, it really helps us ensure all students can learn, create, and cook with confidence.

Kind regards,

David Biles

Head of Technology
